

Anthony Naples Tech Rider and details

Tech Rider

Equipment

2 x CDJ 2000 or equivalent (2000's preferred to 3000's)

1 x Xone 92 or 96 mixer

2 x Monitors positioned at ear level, not wedges on the floor - if only one is available than I would prefer it on the stage right side of the booth, not left.

Mixer alternatives/preferences (please check in before changing out without notice)

- Pioneer V10
- E&S DJR4000
- PlayDifferently Model 1.4/1.6
- Last case scenario... any other pioneer mixer. It is totally chill to use them but Xone 92 or 96 is preferred if available.

Bonus preferences:

- I prefer at all times to be on ground level, or slightly higher than the crowd at most. Stages of 2" or higher I like to avoid if I can in club settings, understandably not possible in festival settings but just putting it out there.
- 3 CDJs as opposed to 2 is cool if it's available and or set up for other people on the line up, but please don't go out of your way to provide it for me specifically!

Hospitality Rider

- Water (still or sparkling)
- Drink tickets
- If any sort of Sparkling Maté drink is available that would be cool but no other caffeinated beverages necessary
